

The 5th ScAIEM Conference in Industrial Engineering and Management

Is hosted at the Norwegian University of Science and Technology in Trondheim in 2017.

We wish you all welcome to Trondheim in 27th–29th of November, with the PhD workshop on Monday 27th and the main conference on Tuesday and Wednesday. ScAIEM has rapidly become a place to meet other scholars interested in the Industrial Engineering and Management area, and has around 100 participants from all the Nordic countries. More information will be posted on the webpage (<http://www.ntnu.edu/scaiem2017>) shortly. You can access information about the ScAIEM organization at our website: <http://www.scaiem.org>

Welcome to Trondheim!

For the Conference Organizing Committee,
Tim Torvatn, Conference Chair

What will happen at the conference?

ScAIEM Conference tracks

The heart of the ScAIEM conference is the discussion tracks where you can discuss themes relevant to your work with other IEM academics. We have three tracks: the study track, the research track and the PhD track. Each of the tracks will have between four and six 1–1,5 hour sessions with a theme that is interesting for, and relevant to, the track.

Study track discusses themes related to studies and teaching.

Research track discusses themes related to ongoing IEM research projects.

PhD track discusses themes relevant to PhD students and supervisors.

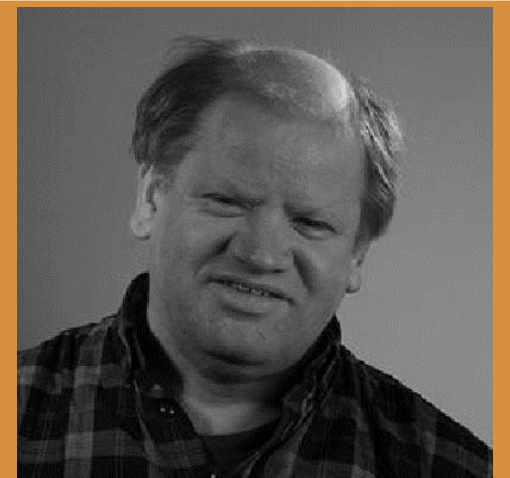

Each session should ideally have at least two presenters from two different countries, presenting their angle to a specific theme, followed by a general discussion among the people present at the session.

We invite all members to send us an e-mail and tell us what they would like to contribute to in terms of themes and questions for the individual sessions. We will have space for 5–6 sessions/themes, and you can send us an email voting for one or more themes that you would like to see/go to, or you could send us a more elaborate suggestion were you promote a theme where you are willing to contribute yourself with material and a presentation. Send the e-mail to the relevant track chair who will try to put together a program for their track based on this feedback. Track chairs are:

PhD Workshop

On Monday 27th of November, we invite PhD candidates and their supervisors to a one day PhD workshop. The aim of the workshop is to support PhD candidates in developing their ideas and manuscripts, by engaging them in academic discussions with junior and senior colleagues. PhD candidates may submit research papers, research proposals or plans for their projects. We would like to attract a mix of candidates who have recently started, are well into their projects or are soon submitting their theses. For active participation, candidates receive 3 ECTS.

PhD Workshop

Jonas Ingvaldsen

IMIT PhD candidate poster award

We encourage PhD candidates to submit posters for the yearly poster competition, sponsored by IMIT (Institute for Management of Innovation and Technology). Further information will be found at our website:
